

# GPS Training

Rapid Map Global provide a range of GPS training courses tailored to suit your needs. Our highly skilled trainers provide you with the opportunity to learn “hands on”, all you need to know about how your equipment operates and how to effectively apply it to a wide range of tasks.

Training is singularly one of the most effective investments an organisation can make, particularly when the results lead to increased efficiency, the minimisation of errors, increase staff work satisfaction and greater staff safety.

- Avoid costly mistakes
- Includes a comprehensive manual
- Significantly increase your GPS skills
- Ask regarding our impressive client list
- Mixture of both classroom and field practical
- Over 2,000 professionals trained Australia wide
- Maximize the benefits of your expensive time in the field
- Importantly, ensure that you are up to date with the latest information on GPS technology

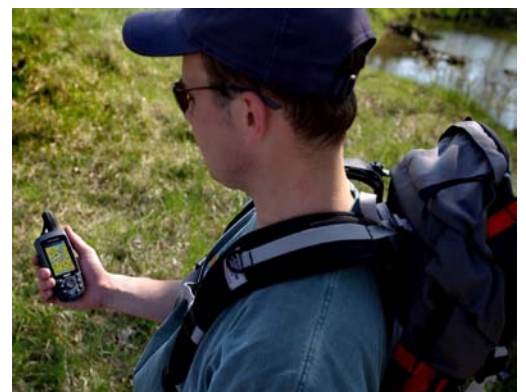

## GPS Fundamentals & Field Applications Course

This comprehensive one-day course covers the fundamentals of the Global Positioning System and its applications. This course also includes a practical exercise in GPS positioning, navigation and data capture for mapping.

Topics covered include:

- Overview of the Global Positioning System
- How position is determined
- Levels of accuracy
- Maximising performance and accuracy
- Importance of Satellite Geometric Strength (DOP)
- Environmental Considerations
- Configuration, customisation and correcting settings
- Software (communicating with your GPS)
- Software (data logging and mapping)
- Field practical exercise in navigation and mapping
- Important factors in selecting a GPS receiver for a task or environment
- Map Datum, Projections and the Map Grid of Australia (MGA)
- Using the GPS for both navigation and the collection of points and lines
- Import into GIS – turn your basic handheld into a powerful mapping tool
